

CUSTOMIZED PMPRB Training

Keep your organization up to date on PMPRB's modernization efforts

The IQVIA Price Regulation Consulting group has more than 20 years of experience helping clients navigate the Patented Medicine Prices Review Board (PMPRB) guidelines and communicate effectively with Board staff to achieve optimized pricing.

Our experts provide insights into new developments and help you understand the potential impacts of these changes to your organization.

PMPRB training sessions are available as in-person presentations or via webinars. The material can be adapted to meet your group's specific needs, from reviewing the basics to focusing on specific areas of relevance to your organization's pipeline to reviewing the process and direction for upcoming changes at the PMPRB.

Training sessions can increase cross-functional knowledge and educate management by providing a broad understanding of PMPRB policies and the Board's role in pricing. The process, methodologies and strategic considerations involved in PMPRB price review will be covered for both new and existing drugs.

IQVIA can provide a session focused on the changes being proposed by the Minister of Health and the PMPRB to help predict the impacts to your organization.

Sessions are available in-person or via webinar for groups as small as 2 or as large as 200.

Customizable training sessions can accommodate:

- Executive briefing on the current direction for change (1-2 hours)
- In-house review of PMPRB rules and upcoming potential directions for change (2-4 hours)
- A combination of fundamental and advanced concepts (full day)
